

RUFI AIMAN

BCA Graduate | Python · Django · React · Generative AI | Data Science & Full-Stack

Mysuru, Karnataka, India | rufiaiman7790@gmail.com | 8549931775
github.com/Rufi-1 | linkedin.com/in/rufi-aiman-6a7bba319

SUMMARY

BCA graduate (CGPA 8.73) and hands-on developer with experience building and deploying multilingual AI applications, data analytics tools, and full-stack web projects in Python and JavaScript. Completed a Data Analytics internship and is currently training in Full Stack Development and Data Science at QSpiders, Mysuru. Available for immediate full-time joining.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL, C

Frontend: HTML5, CSS3, JavaScript, React.js, responsive design, component-based development, form handling, client-side validation, DOM manipulation

Backend: Django, Django REST Framework, REST APIs, API integration, JSON, backend application logic

Generative AI & RAG: Generative AI, RAG pipelines, vector databases, embeddings, semantic retrieval, context grounding, prompt engineering, LLM API integration, multilingual AI workflows

AI Tools & Models: Groq API, Llama 3.3, Gemini API, Whisper, gTTS, Google Translate API, Google AI Studio, Streamlit

Data Analysis & Visualization: Pandas, NumPy, SciPy, Matplotlib, Seaborn, Microsoft Excel (Pivot Tables, ToolPak), data cleaning, EDA, feature engineering, data profiling, data validation, anomaly detection, root-cause analysis

Statistics: Descriptive and inferential statistics, correlation, covariance, hypothesis testing (t-test, ANOVA, chi-square, Shapiro-Wilk), IQR method

Databases: SQL, DBMS, SQLite, JSON-based data handling

Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, Streamlit, Google AI Studio

Currently Learning: Next.js, TypeScript, Tailwind CSS, FastAPI, Node.js, Power BI, Machine Learning, MLOps, cloud AI platforms

EXPERIENCE

Data Analytics Intern — Spatialhawk Geo-Informatics Pvt. Ltd., Mysuru May 2026 – July 2026

- Cleaned and standardized structured datasets using Python and Pandas: handled missing values, removed duplicates, and identified data inconsistencies.
- Applied feature-engineering and data-transformation concepts, detected anomalies using boxplots and the IQR method, and documented possible root causes.
- Wrote SQL queries and prepared Excel Pivot Table reports for descriptive analysis and stakeholder reporting.
- Built practical skills in data validation, analytical problem-solving, documentation, and communicating technical findings.

PROJECTS

Indian AI Dietician

github.com/Rufi-1/indian-ai-dietician

Python, Streamlit, RAG, Vector Database, Groq API, Llama 3.3, Whisper, gTTS, Google Translate API, bcrypt

- A multilingual, voice-enabled RAG application that generates personalized, ICMR/NIN-aligned diet plans for Indian users.
- Designed a RAG workflow that retrieves nutrition context from a vector database before generating grounded LLM responses.
- Integrated Groq-hosted Llama 3.3 for diet-plan generation in 5 languages.
- Added Whisper voice input, gTTS audio output, Google Translate API integration, bcrypt authentication, and persistent user-history tracking.
- Built the interactive frontend with Streamlit.

MediLingo — Healthcare Language Assistant

github.com/Rufi-1/medi-lingo

Python, SQL, Gemini API, Streamlit, gTTS

- An AI-powered assistant that converts complex medical terminology into clear, patient-friendly explanations.
- Integrated the Gemini API for contextual explanations in English and Hindi.
- Added written and audio responses for accessibility.
- Selected by one competition judge among their top three project selections at Google Prompt to Prototype.

Data Analytics Studio

github.com/Rufi-1/data-analytics-studio

Python, Pandas, NumPy, SciPy, Matplotlib, Seaborn, ipywidgets

- A dataset-agnostic analytics application that adapts its statistical pipeline to any uploaded dataset.
- Implemented dataset inspection, summary statistics, correlation, covariance, and inferential tests (Shapiro-Wilk, t-test, ANOVA, chi-square).
- Built 60+ auto-generated visualizations for distributions, relationships, and outliers, plus an interactive chart builder.
- Designed reusable analysis steps for different dataset structures.

Personal Web & Full-Stack Projects (in progress)

github.com/Rufi-1

React.js, JavaScript, HTML, CSS, Django, REST APIs

- Practice-driven full-stack applications focused on responsive UI, form handling, and frontend-backend integration.
- Built reusable React components and managed user interactions; developed backend logic with Python and Django.
- Connected frontend interfaces to backend services via REST APIs.
- Practiced debugging, validation, error handling, and user-flow testing.
- Includes this interactive 3D portfolio (React, TypeScript, Vite, React Three Fiber) deployed on Vercel:
world-tour-portfolio.vercel.app

EDUCATION

Bachelor of Computer Applications (BCA)

2026 | CGPA: 8.73

Maharani's Science College for Women, Mysuru

Relevant areas: Python programming, SQL, DBMS, statistics, web technologies, software development, data structures.

Pre-University Course (PCMB)

2023 | 84.12%

Farooqia Girls Composite College

SSLC

2021 | 84.32%

Little Gems School

CERTIFICATIONS

- Google AI Studio: Building & Deploying Apps — GUVI & HCL (2026)
- Basic Computer Course — STP Computer Education (2024)

ACHIEVEMENTS

- Google Prompt to Prototype — MediLingo selected by one judge among their top three project selections.
- Participant — India AI Impact Buildathon 2026.
- Participant — AI for Bharat Hackathon.
- Built and deployed independent AI, data, and web applications.

AVAILABILITY

Open to full-time roles, remote work, and contract opportunities in AI, full-stack, and data-focused roles.
